## TEST 2 STUDY GUIDE

| Topic | Text <br> Reference |
| :---: | :---: |
| CHAPTER 16 |  |
| - Know the general characteristics of acids and bases | Notes, 16.2 |
| - Know the Arrhenius definition of acids and base | 16.3 |
| - Know the Brønsted-Lowry definition of acids and bases | 16.3 |
| - Identify Brønsted-Lowry acids and bases in a chemical equation | 16.3 |
| Know the Lewis definition of acids and base | 16.11 |
| - Identify Lewis acids and bases in a chemical equatio | 16.11 |
| - Determine relative acid and base strengths from chemical equations | Notes |
| - Predict direction of a reaction based on acid and base strengths | Notes |
| - Rank strength of acids based on their molecular structures | 16.10 |
| - Rank strength of diprotic and polyprotic acids | 16.9 |
| - Calculate $\left[\mathrm{H}_{3} \mathrm{O}^{+}\right]$and $\left[\mathrm{OH}^{-}\right]$for any solution based on $\mathrm{K}_{\mathrm{w}}$ constan | 16.6 |
| - Calculate $\left[\mathrm{H}_{3} \mathrm{O}^{+}\right]$and $\left[\mathrm{OH}^{-}\right]$for strong acids and bases from their concentration | 16.7 |
| - Know pH and pOH scales and their relationship to acid and base characteristics of solutions | 16.4 |
| - Calculate pH and pOH of a solution from given data | 16.6 \& 16.7 |
| - Rank acidity or basicity of solutions based on their pH or pOH values | Notes |
| - Know what an acid ionization constant is and how its value determines the strength of an acid | 16.4 |
| - Write the expression for acid ionization constant | 16.4 |
| - Know the relationship of $\mathrm{K}_{\mathrm{a}}$ to the pH and \% ionization of an acid | Notes |
| - Know the relationship of concentration to the pH and \% ionization of an acid | Notes |
| - Calculate the acid ionization $\left(\mathrm{K}_{\mathrm{a}}\right)$ constant given the pH of a weak acid solution | 16.6 |
| - Calculate the pH and $\%$ ionization of a weak acid solution given the acid ionization constant ( $\mathrm{K}_{\mathrm{a}}$ ) | 16.6 |
| - Calculate pH of mixture of acids: 2 strong, strong and weak and 2 weak | Notes |
| - Know the equilibria for polyprotic acids | 16.9 |
| - Calculate the concentration of various species for a diprotic acid given $\mathrm{Ka}_{1}$ and $\mathrm{Ka}_{2}$ | 16.9 |
| - Write the expression for base dissociation constant | 16.7 |
| - Calculate the concentration of various species in a weak base solution given $\mathrm{K}_{\mathrm{b}}$ | 16.7 |
| - Calculate $\mathrm{K}_{\mathrm{b}}$ from Ka and vice versa | 16.8 |
| - Write equations for the hydrolysis of salts of weak acids and bases | 16.8 |
| - Predict whether a salt solution is acidic, basic or neutral | 16.8 |
| - Calculate the pH of a salt solution | 16.8 |
