

LOS ANGELES MISSION COLLEGE-FALL 2018
CHEMISTRY 65-SECTIONS 16015 & 16018 OR 21500
Lecture (16015): TTH 8:55 -10:20 Am ; Room: CMS-028
Lab (16018): T 10:30 am-1:40 pm ; Room: CMS-201
Lab (21500): TH 10:30 am-1:40 pm ; Room: CMS-201

INSTRUCTOR (LEC): Said Pazirandeh
E-MAIL: profpaz@earthlink.net
or paziras@lamission.edu
WEBSITE: www.profpaz.com

OFFICE PHONE: (818)364-7705
OFFICE: CMS 242
OFFICE HOURS: MW 10:30 -11:30 AM
F 10:00 -1:30 PM

INSTRUCTOR (LAB) : Mike Fenton
E-MAIL: fentonms@lamission.edu

OFFICE PHONE: (818) 364-7888
OFFICE: CMS 243
OFFICE HOURS: M 3:00-5:00 PM
TTH 1:40-3:10 PM

CLASS DESCRIPTION: Chemistry 65 is an introductory course for science majors who have not taken any previous chemistry or who need a refresher course. It is designed to prepare students who wish to continue to general Chemistry 101. This course may also be taken to satisfy the Physical Science requirement for General Education. Chemistry 65 at LA Mission College is equivalent to Chemistry 100 and Chemistry 100L at CSUN.

PREREQUISITE: Mathematics 125 or 123C (Intermediate Algebra) with a grade of "C" or better.

REQUIRED MATERIALS:

- Textbook:** "Introductory Chemistry", by Nivaldo J. Tro, 5th Edition, ISBN: 978 0 321 910073. See website for detailed information on [textbook choices](#).
In this course you will be using **MasteringChemistry**[®], an online tutorial and homework program that accompanies your textbook. To access the online system, you will need an access code that can be obtained in one of the following ways: Student Access Code that has been packaged with your new textbook, or you can purchase access online at www.masteringchemistry.com.
➤ A copy of the textbook is available on Reserve in the Library.
- Lab Manual:** There is no lab manual available for this course. The information for each lab experiment is available on the class page at www.profpaz.com.
- Lab Notebook:** A bound-type carbonless lab notebook is required for your lab. Your lab instructor will provide more information about this in the lab.
You must have the Laboratory Notebook by the second class meeting. You are required to report all laboratory work in your Laboratory Notebook. During the Laboratory Activities you are not permitted to take notes on any kind of loose paper or any notebook, other than the Laboratory Notebook. You may not perform an experiment if you do not have your Laboratory Notebook with you.
- Periodic Table of Elements:** This is available on my website. You must have one [Periodic Table](#) with you during all class sessions.
- Scientific Calculator:** Need not to be an expensive type, but it must perform the following operations: Multiplication, Division, Addition, Subtraction, square root, 1/x, and log. You are required to have your calculator with you during all class sessions (both lectures and labs).
- Safety Goggles:** Unless specifically instructed otherwise by your instructor, you must wear safety goggles during laboratory work. Safety goggles are available for purchase in the LAMC Bookstore. You are required to have your safety goggles by the second class session. You may keep your goggles locked in your laboratory locker.
➤ Failure to wear goggles when directed by the instructor is grounds for dismissal from the laboratory.
- Notebook:** A 3-ring binder is recommended for keeping class notes organized.

**STUDENT
LEARNING
OUTCOMES:**

1. Conceptualize, model and explain chemical processes qualitatively at the molecular level. ([Assessment rubric](#))
2. Apply mathematics to solve quantitative chemical problems. ([Assessment rubric](#))
3. Extract appropriate information, analyze and synthesize experimental results to reach correct conclusions. ([Assessment rubric](#))
4. Perform laboratory techniques safely and accurately and maintain a laboratory notebook according to standard scientific guidelines. ([Assessment rubric](#))

ATTENDANCE:

- CHEMISTRY IS A DEMANDING SUBJECT!
- YOU CANNOT AFFORD TO BE ABSENT IF YOU WISH TO DO WELL IN THIS COURSE.
- THERE IS NO MAKE-UP FOR MISSED LABORATORY WORK.
- College regulations state that a student may be excluded from a course following accumulation absences equal to a week of course work.

**COURSE
EVALUTATION:**

Your final grade in class is composed of the following:

Quizzes	50 pts
Exit Tickets	75 pts
Online Homework	25 pts
Exams (3)	300 pts
Final Exam	150 pts
1 st Lab Exam	50 pts
Final Lab Exam	150 pts
Lab Reports	250 pts
Total	1000 points

**GRADING
SCALE:**

The final grades cutoffs are as follows:

A	90% - 100%
B	80% - 90%
C	65% - 80%
D	55% - 65%
F	Below 55%

NOTES:

- **Exit Tickets** are worksheets that are handed out after each lesson to provide practice and assessment of your knowledge on the topic discussed. They are due the next class meeting after distribution. No late Exit Tickets are accepted.
- **No make up** exams are given for students being absent on the day of the exam.
- If serious and compelling reasons prevent the student from being present on the day of one of the exam, the instructor should be informed **IN ADVANCE** for possible arrangements.
- Maximum of one make-up exam and one make-up quiz per semester is allowed.

LABORATORY WORK

- During laboratory work two students will share the contents of the same laboratory locker.
- Both students are jointly responsible for the contents of their shared locker.
- The majority (not all) of the experiments are performed in pairs.
- **For every experiment, each student,**
 - 1. will take active part in the work,**
 - 2. report his/her data individually,**
 - 3. do his/her own calculations,**
 - 4. turn in an individual lab report for grading purposes and**
 - 5. will be assigned an individual grade for every activity.**
- Laboratory Reports are due one week after the class period in which the experiments have been performed (this is to allow working students to meet the deadline).
- **Late reports are subject to a penalty of 10% per week.**
- Once the instructor has returned the graded lab reports to the class, lab reports for that particular experiment are no longer accepted for grading.
- In order to work efficiently and meet the required deadline for turning in the lab reports, **you must come** to the laboratory well prepared.
- **This means:**
 - 1. Read carefully (several times, if needed) the Experiment you will perform (both Principles and Procedure) prior to coming to the lab.**
 - 2. Think about what will be doing and plan ahead.**
 - 3. Prepare your Laboratory Notebook in advance (Purpose of the Experiment, Procedure, and the appropriate Data Tables should be prepared in your Lab Notebook in advance).**

THERE IS NO MAKE-UP LABORATORY WORK

INSTRUCTIONS FOR LABORATORY NOTEBOOK

Each student must have a **spiral bound copy (bottom page) perforated** Laboratory Notebook (50 pages) in which to record data and observations, do calculations, and analyze results of the lab work. The Lab Notebook must be brought with you to every lab session and all data and observations must be recorded **directly into the Notebook** (no where else) **and in ink** (no pencil). Laboratory records are legal documents in industry and research. They are required to support patent applications or to resolve disputes or originality of research.

The laboratory notebook is a permanent record of all work performed in the laboratory. It is the place where a scientist records all of his or her data, measurements, and observations for future reference. In an academic setting the lab notebook is the storehouse for all information the researcher will use to write articles for scientific journals. In an industrial setting the lab notebook is not only a record of the experiment. It is a legal document that may be critical for obtaining a patent. It should contain enough information so that another scientist could read the notebook and repeat the experiment.

One of the most critical skill that you must learn is to neatly record all your measurements and observations directly in your lab notebook at the actual time you make them. It is improper to scribble data on a loose sheet of paper or to rely on your memory to preserve your observations. Learning to keep complete, reliable records is an important part of learning how to become a good scientist. Here is some general information about keeping a lab notebook and also some information about the specific sections you should have for each experiment.

General Information

- Your notebook must be bound, having duplicate style sheet. Do not remove original pages from the notebook.
- Write your name, Chemistry 65, your lab section, and semester on the inside front cover.
- Write only on the front side of each white sheet. A duplicate copy will automatically appear on the yellow/blue sheet behind it. Apply sufficient pressure to make a legible copy, but not so much that the writing appears on the next pair of sheets. Remember to place the cardboard between each pair of sheets.
- Unless your lab notebook has a table of contents, reserve the first two pages for a table of contents.
- All entries in your lab notebook must be made in permanent ink. If you make an error, do not attempt to erase it or use a whiteout. Just draw a single line through the incorrect entry.
- Learn to write in the **past tense**, third person (without the use of personal pronouns such as I, we, and my).

Sections of the Notebook For Each Experiment

Title. Begin each new experiment on a blank page. Put the full title of an experiment on top of that page. (Write the same title in your table of contents along with the starting page number).

Objectives. Under the title, list the specific objective(s) for the experiment in concise statement(s). Write a short statement (one or two sentences, in your own words) of the purpose or the goal of the experiment. If the experiment contains more than one part, indicate objective of all parts of the experiment.

Procedure & Data. Procedure should be a brief outline of each step in the experiment, including amounts of each reagent used, size of glassware, and equipment(s) used. Leave space between each step of the procedure to record the appropriate data next to it. Use only the left column of the notebook.

Right column will be used for observations and data to be recorded. You can use the Report Form available for each experiment and include pertinent data tables and other information in this section.

****NOTE.** *The three sections above must be completed before your come in to the lab (no lab will be started unless the following sections are completed).*

Observations and Measurements. You should also record observations of everything that happens during the experiment as it happens using right column of the notebook. Especially pay attention to any change in color, the amount of time it takes for a reaction to occur, unexpected occurrences, temperature readings, amount of solvent used in the experiment, etc. Also write down any modifications you make to the procedure in this section.

All numerical data should be recorded directly in the notebook with the proper significant figures and units. Any data recorded on another piece of paper, such as chromatogram, should be permanently attached into the notebook as instructed.

Calculations & Results. All sample calculations must be shown in the notebook, including the subtracting of masses to find the mass of a sample, the use of density to convert between mass and volume, the use of molecular weight (or molar mass) to convert between mass and moles, etc. Your calculation section must include an equation, substitution and answer with significant figures and units. Summarize experimental findings in a tabulated format with correct significant figures and appropriate units.

Questions and Problems. Answer questions and problems at the end of each Report Form.

TENTATIVE LECTURE SCHEDULE

Week	Date	Chapter	Lecture Topic	Text Reference
1	Aug 28	1	Introduction to class; Scientific Method	1.2-1.4
	Aug 30	2	Scientific Notation; Significant Figures; SI Units	2.2-2.5
2	Sep 4	2	Unit Conversions & Problem Solving	2.6-2.10
	Sep 6	3	Classification & Properties of Matter	3.2-3.7
3	Sep 11	3 ----	Heat & its Calculations Review for Test 1	3.8-3.12 -----
	Sep 13	4	Atomic Theory & Structure; Intro to Periodic Table	4.2-4.4
4	Sep 18	-----	Test 1 (Chap 1-3)	-----
	Sep 20	4	Intro to Periodic Table; Ions; Isotopes; Atomic Mass	4.5-4.9
5	Sep 25	5	Compounds & Their Properties; Writing Formulas for Ionic Compounds	5.1-5.5
	Sep 27	5	Naming Ionic & Molecular Compounds; Formula Mass	5.6-5.11
6	Oct 2	6	Mole Calculations	6.2-6.5
	Oct 4	6	Percent Composition; Empirical & Molecular Formulas	6.6-6.9
7	Oct 9	-----	Review for Test 2	-----
	Oct 11	-----	Test 2 (Chap 4-6)	-----
8	Oct 16	7	Chemical Reactions; Balancing Equations	7.2-7.4, 7.10
	Oct 18	7	Aqueous Solutions; Precipitation Reactions	7.5-7.7
9	Oct 23	7	Neutralization & Redox Reactions	7.8-7.9
	Oct 25	8	Stoichiometry; Limiting Reactant	8.2-8.5
10	Oct 30	8	Percent Yield; Energy & Chemical Reactions	8.6-8.7
	Nov 1	9	Modern Atomic Theory; Orbitals	9.2-9.6
11	Nov 6	-----	Test 3 (Chap 7-8)	-----
	Nov 8	9	Electron Configuration; Periodic Properties	9.7-9.8
12	Nov 13	10	Lewis Structures; Resonance	10.2-10.6
	Nov 15	10	Molecular Shapes; Electronegativity & Polarity	10.7-10.8
13	Nov 20	11	Gases & Their Properties; Gas Laws	11.2-11.6
	Nov 22	-----	Thanksgiving Day – College closed	-----
14	Nov 27	11	Ideal Gas Law; Gases in Reactions	11.7-11.10
	Nov 29	13	Solution Concentrations & Stoichiometry	13.5-13.8
15	Dec. 4	13	Acid-Base Titrations	13.8
	Dec 6	12	Intermolecular Forces	12.6
16	Dec 11 (10:00-12:00)	-----	Final Exam (Chapters 9-13)	-----

TENTATIVE LABORATORY SCHEDULE

Week	Date	Exp. #	Activity	Points
1	Aug 28	-----	Introduction to Lab; Safety Video	-----
	Aug 30		Check-in; Guidelines for Preparation of Lab Notebook	
2	Sep 4	1	Physical and Chemical Changes	20
	Sep 6			
3	Sep 11	2	Measurements	25
	Sep 13			
4	Sep 18	3	Density	25
	Sep 20			
5	Sep 25	5	Separations Experiment	20
	Sep 27			
6	Oct 2	----	Laboratory Exam #1 (Exp. 1-5)	50
	Oct 4			
7	Oct 9	6	Paper Chromatography	20
	Oct 11			
8	Oct 16	11	Formula of a Hydrate	20
	Oct 18			
9	Oct 23	12	Ionic Reactions	25
	Oct 25			
10	Oct 30	14	Synthesis of NaCl from Soda Ash	25
	Nov 1			
11	Nov 6	19	Specific Heat Capacity	20
	Nov 8			
12	Nov 13	15	Molecular Shape & Polarity	25
	Nov 15			
13	Nov 20	-----	TBD	-----
	Nov 22	-----	Thanksgiving Day – College closed	-----
14	Nov 27	21	Determining Concentration of Acetic Acid in Vinegar	25
	Nov 29			
15	Dec. 4	-----	Check-out Lab Final Exam (Remainder of Experiments)	150
	Dec 6
